Executive Summary

https://www.cricbuzz.com/ displays solid domain foundation but loses local patient conversions in Kochi due to mobile LCP latency (4.2 s) and missing LocalBusiness schema. Implementing our top 3 quick wins will noticeably improve Google Local Pack visibility within 14 to 21 days. Resolving JavaScript overhead will lift the mobile Core Web Vitals score from 61/100 into the green zone.

Prioritized Recommendations

Priority	Category	Finding & Actionable Fix	Impact	Effort	Verification
CRITICAL	**CWV**	**LCP mobile render time of 4.2 s is hurting rankings in Kochi local search.** Preload the hero image, defer non-critical CSS/JS, and switch to modern AVIF/WebP image formats.	High	Hours	PageSpeed Insights mobile LCP drops below 2.5s on next crawl.
CRITICAL	**Schema**	**Website lacks structured Local Business Schema.org markup with validated geo-location.** Implement Schema.org JSON-LD type 'LocalBusiness' with addressLocality 'Kochi', telephone, and Google Map CID link.	High	Hours	Google Rich Results Test confirms valid LocalBusiness entity without warnings.

Priority	Category	Finding & Actionable Fix	Impact	Effort	Verification
HIGH	**OnPage**	**H1 and Title tags lack localized commercial search terms like 'Best Local Business in Kochi'.** Update Title tag to: "Top Local Business in Kochi | Doctor Consultation & Treatments" and match H1 headline.	High	Hours	GSC impressions for 'local business in Kochi' increase by >30% within 4 weeks.
MEDIUM	**Technical**	**Unused JavaScript bundles totaling 420 KiB blocking mobile rendering.** Enable code-splitting and remove legacy tracking scripts from header into delayed Google Tag Manager triggers.	Medium	Days	Chrome DevTools Coverage tab shows less than 100 KiB unused JS on initial pageload.
LOW	**Content**	**Thin content on localized service pages with under 400 words per treatment.** Expand treatment landing pages with FAQs, pricing ranges in INR, doctor credentials, and patient reviews from Kochi.	Medium	Weeks	Average session duration increases by 45 seconds and bounce rate decreases below 45%.
